

Caselet Problems

Questions 1-3:

Mr. Shyam wants to buy a watch which is priced at Rs. 40,500. The watch is also available at Rs. 20,000 down payment and the monthly installments of Rs. 1400 per month for 2 years or Rs. 16,000 down payment and a monthly installment of Rs. 1100 per month for 3 years. Mr. Shyam has with him Rs. 10,000 only. He wants to borrow the balance money of the down payment from a private firm. The terms of that private firm are:

If Rs. 5000 is borrowed for a period of 12 months, the rate of interest is 20 %. The interest will be calculated on the whole amount for the whole year itself. Thus the borrower needs to pay an amount of Rs. 500 per month for 12 months, because 5000 is the principal amount + 1000 as the interest rate.

If more than Rs. 9,000 is borrowed for 1 year, the rate of interest is 25 % and is calculated in exactly way as given above.

Question 1:

Suppose that Mr. Shyam is ready to pay either of the down payments then which of the installments schemes is the better option of the two? (Assume that Mr. Shyam will pay the installments out of his own pocket and he keeps his savings with himself and earns no interest on the same. Also assume that instead of borrowing the remaining money for the down payment, he saves the balance before the purchase.

- A. 1100 for 3 years
- B. 1400 for 2 years
- C. Either A or B
- D. Data insufficient

Question 2:

What is the percentage difference in the total amount paid to the watch dealer, between the two instalment schemes (with respect to the total payment of the scheme with Rs. 20,000 as the down payment)?

- A. 3.73 %
- B. 3.37 %
- C. 3.33 %
- D. 3.53 %

Question 3:

If Shyam can spare an extra of Rs. 2500 which is to be paid to the watch dealer and the money lender from his monthly earnings start from the first month itself, which scheme would Shyam choose?

- A. 1200 for 2 years
- B. 1400 for 2 years
- C. 1100 for 3 years
- D. Data insufficient

Questions 4-8:

It is a very known fact the growth of hotels is driven by the increase in the number of people that are using the hotels and an increase in per person use of the hotel. In 2014, it is expected that there will be 20 crore hotel users in Spain or about 20 % of the population will generate Rs. 50 billion as hotel revenues. It is also believed that the revenues in the industry should expand from Rs. 50 billion to Rs. 150 billion by 2018, while the number of users should grow to over 56 crores or to about half the population of Spain in the same duration.

Question 4:

What is the estimated population of Spain in 2014?

- A. 90 crores
- B. 100 crores
- C. 105 crores
- D. 120 crores

Question 5:

What will be the average growth rate of the population of Spain from the given period 2014 – 2018?

- A. 2.5 %
- B. 3.2 %
- C. 3 %
- D. 3.7 %

Question 6:

Find the actual growth in the percentage of users in Spain by 2018?

- A. 180 %
- B. 120 %
- C. 150 %
- D. 200 %

Question 7:

It is believed that if the 50 % the population of any country can afford the hotel-use, then it is considered as economically developed. Based on the belief can we determine whether Spain will be an economically developed country by 2017?

- A. Yes
- B. No
- C. Maybe
- D. Data insufficient

Question 8:

In the given time period what will be the growth of the hotel industry?

- A. 210 %
- B. 200 %
- C. 220 %
- D. 240 %

Questions 9-13:

Out of the total number of 7800 girls in a college, 15% are good at dancing and 20% of the number of girls good at dancing is also good in studies. 5% of the total numbers of girls in the college are good at drawing and 10% of the girls good at drawing are also good in studies. 35% of the total numbers of girls in the college are good at cooking and 20% of the girls good at cooking are also good in studies; also, 30% of the girls good at cooking are good at dancing but not well in studies. 10% of the total numbers of girls in the college are good only at singing. 25% of the total numbers of girls in the college are good at sports and 16% of the numbers of girls good at sports are also good at studies. Rest of the girls from the college are only good at studies.

Question 9:

How many girls from the college are good at dancing?

- (a) 1755
- (b) 1989
- (c) 1170
- (d) 1898
- (e) None of these

Question 10:

How many girls from the college are good only at cooking?

- (a) 2730
- (b) 2184
- (c) 1365
- (d) 1545
- (e) None of these

Question 11:

How many girls from the college are good at drawing but not in studies?

- (a) 351
- (b) 380
- (c) 400
- (d) 390
- (e) None of these

Question 12:

How many girls from the college are good at studies?

- (a) 1851
- (b) 780
- (c) 1911
- (d) Data inadequate
- (e) None of these

Question 13:

How many girls from the college are good only at singing?

- (a) 780
- (b) 750
- (c) 700
- (d) 800
- (e) None of these

Questions 14-18:

A survey conducted on 1200 villages shows that 25% of the total villages have only adequate water supply. 15% of the total numbers of villages have proper supply of electricity only. 7% of the total numbers of villages have only proper education facilities. 12% of the total numbers of villages have telecommunication services only. 16% of the total numbers of villages have proper healthcare services only. 6% of the total numbers of villages have adequate water as well as supply of electricity. 8% of the total numbers of villages have adequate supply of water, supply of electricity well as healthcare services. 5% of the total numbers of villages have proper supply of electricity, telecommunication services as well as healthcare services and 6% of the total numbers of villages have all the facilities.

Question 14:

How many villages in all have adequate water supply?

- (a) 430
- (b) 450
- (c) 540
- (d) 810
- (e) None of these

Question 15:

How many villages in all have adequate supply of water as well as electricity?

- (a) 36
- (b) 108
- (c) 72
- (d) 120
- (e) None of these

Question 16:

How many villages in all do not have proper supply of electricity?

- (a) 720
- (b) 850
- (c) 920
- (d) 1080
- (e) None of these

Question 17:

How many villages have only proper education facilities?

- (a) 108
- (b) 84
- (c) 36
- (d) 72
- (e) None of these

Question 18:

How many villages have all the facilities?

- (a) 90
- (b) 126
- (c) 144
- (d) 72
- (e) None of these

Questions 19-20:

A tea taster was assigned to rate teas from six different locations - Munnar, Wayanad, Ooty, Darjeeling, Assam and Himachal. These teas were placed in six cups, numbered 1 to 6, not necessarily in the same order. The tea taster was asked to rate these teas on the strength of their flavour on a scale of 1 to 10. He gave a unique integer rating to each tea.

Some other information is given below:

1. Cup 6 contained tea from Himachal.
2. Tea from Ooty got the highest rating, but it was not in Cup 3.
3. The rating of tea in Cup 3 was double the rating of the tea in Cup 5.
4. Only two cups got ratings in even numbers.
5. Cup 2 got the minimum rating and this rating was an even number.
6. Tea in Cup 3 got a higher rating than that in Cup 1.
7. The rating of tea from Wayanad was more than the rating of tea from Munnar, but less than that from Assam.

Question 19:

What was the second highest rating given?

- a) 7
- b) 8
- c) 9
- d) 3

Question 20:

What was the number of the cup that contained tea from Ooty?

- a) 4
- b) 5
- c) 6
- d) 7

THANK YOU
